**ANIMAL SCIENCE**

An animal science career has many options, from a veterinarian or a nutritionist, to a meat scientist or a farm safety expert.

**AG ENGINEER**

Ag engineers help in ways like designing farm layouts to creating processes that ensure farms are being sustainable for the future of the earth and industry.

**FARM HAND**

Farm hands can include a variety of different jobs, including a milker, calf raiser, tractor driver and more!

**FARM MANAGER**

Managers can own and/or manage big or small farms and help to make sure each person and animal has what they need for a healthy and productive farm experience.

**AG COMMUNICATIONS**

A career in agriculture communications has a range of opportunities in marketing, public relations, social media strategy, advertising and more.

What does cheese do on Halloween? The Muenster Mash!
